If you are using the electronic version of this catalogue this icon will take you back to this CONTENT page upon clicking.

Parker declares that all products featured in this catalogue conform to REACH and RoHS regulations.

**2 day
despatch**

For all products
featured in this catalogue*.

Only when ordered via PHconnect or EDI. See specific products for max. capacity.
Exception: Global Bladder Accumulator and QAC Series.

This **Fast Track Distribution Catalogue** only features products that are available at fast dispatch times and has been specially developed for Parker Distributors in Europe, Middle East and Africa.

At Parker we understand your need for easy ordering and fast shipping. All departments are committed to promote your success, and we don't compromise in our joined effort to offer you premium products at an extremely fast despatch time.

Please note that the stated despatch time is guaranteed only when you're using PHconnect or EDI to place your order.

If you are interested in the complete range of our accumulators and coolers series please see the respective catalogues in our [library](#)

Or refer to our website:

www.parker.com/acde

A more extensive range of products for use in all countries, as well as other industry specific approvals is available on the Parker website and within the respective product catalogues.

Fast Track

Parker guarantees the delivery times stated in this catalogue until November 2021.

Accumulators

Bladder Accumulators
and Accessories

Bladder Accumulator EHV Series - C & D gas valve

The EHV bladder accumulator is designed for high pressure hydraulic systems.

- Standard version (Carbon Steel shell/NBR mix) compatible with mineral oils.
- Conforms to PED 2014/68/EU, EN 14359, Fluid Group 2.

Accumulator Set

Parker Olaer have developed an Accumulator Set which is easy to install and easy to order.

- Based on standard accumulator products, according to PED2014/68/EU, EN 14359 Fluid Group 2
- Temperature range -20°C to +80°C
- Safety Block: Includes pressure relief valve sealed, CE marked by BV

The accumulator set will be delivered in a single shipment | Accumulator pre charge at 150 Bar Nitrogen (P0) | Refer to catalogue for clamps quantity advice (additional clamps may be ordered separately)

Set includes:

- 1 x Bladder Accumulator (Pre-charged 150 bar)
- Clamp(s)
- Bracket
- Safety Block

Global Bladder Accumulator

The Parker Global Accumulator offers multi-international certification (SELO, ASME & CE) as well as improved technology and design.

- Certification CE 350 bar / ASME 3800 psi + GB 280 Mpa only for 32L and 50L (SELO)
- Carbon steel components / Mix 25 bladder
- Standard RAL5005 epoxy painting 30-50µm
- G2" "DA" fluidport (maximum flow rate = 1200 L/min) ; Gas valve B
- Standard RAL5005 epoxy painting 30-50µm
- No precharge
- English/German/Chinese name plate with double units (SI / USA)
- Name plate ready for PTS label
- Special packaging (box quantity - refer to table below)

Part Number	Description	Gas valve design	Effective Volume (Litres)	Pressure (PS)	DA fluid port connection	Box quantity

Distributor goes Certified Service Center

Parker Certified Service Centers have been established with certified Parker distributors to optimise customer systems by combining industry leading products backed by quality service, to deliver stressfree accumulator management alongside maximised performance, efficiency and safety.

With locations across Europe, Certified Service Centers offer an integrated solution that combines products, services and technologies, whether on an inhouse at the Service Center),mobile or onsite basis.

With regard to the use of original spare parts, tangible benefits include shorter inspection time and the reduction of complexity in logistics (tracking systems,data monitoring and recording)and documentation, both of which help to lower costs and save time.

Certified Service Centers can utilize the Parker Tracking System (PTS) which helps schedule accumulator maintenance, providing automated notifications on inspections and replacement parts.

Safety First - Reduced risk of accidents and protection for your employees by:

- Utilizing engineers with expert product knowledge in technology and regulation.

Reduced down time and increased productivity through:

- Warranty validation and preventative maintenance to increase reliability
- Reduction of inspection time
- Implementation of preventative maintenance

Reduction in time and costs from:

- Simplified logistics and documentation
- Simplification of administration required to comply with laws and regulations.

In-House Service

Mobile Service

(Engineer will come to you with fully equipped vehicle, spare parts, and test equipment).

On-Site Service

(Engineer will provide expert service even in the most remote location).

Clamps

Parker Olaer Clamps are designed to allow quick and easy installation of hydraulic accumulators.

- Available in carbon and stainless steel
- Steel with zinc plated protection, Rubber EPDM (48) or NBR (25)

VGU KIT

- VGU universal tester and pressuriser
- Set of accumulator adaptors (5/8", 7/8", 7/8" long, G1/4", 8V1)
- 1 pressure gauge 0-25 Bar & 1 pressure gauge 0-250 Bar
- Special nitrogen hose (length 2,5 m)
- Nitrogen connection according to country standard

SC-VGU KIT

- VGU universal tester and pressuriser
- 9 Different Adaptors: 7/8"UNF (short), 7/8"UNF (long), 5/8"UNF, 0.302"(8V1), G 1/4", M28x1.5, M16x200, M16x150, 3/4"BSP HEX
- 4 Pressure Gauge: 0 - 6 bar / 0 - 25 bar / 0 - 250 bar / 0 - 400 bar
- 1 Extender Hose for safe operation in tricky spaces
- 1 Gas Flow Limiter to control the initial pre-charge speed
- Nitrogen connection according to country standard
- Robust Case

SensoNODE Kit for Accumulators

A regular control of the nitrogen pressure allows a durable and efficient operation of the accumulator. The new SensoNode sensor transmits nitrogen pressure / temperature information via a Bluetooth connection to a mobile device (tablet or smartphone) using Scout Mobile Parker application. The purpose of this equipment is to simplify the maintenance of the accumulators by allowing a frequent control of the nitrogen pressure while avoiding dangerous situations for the operator.

PRODUCT FEATURES

Accuracy: 1,5% of the total measuring scale

Temp range: -40°C to +85°C

Measurement cycles: > 1 million

Burst pressure: 3 x working pressure

SAFE

- ⇒ Easy Maintenance
- ⇒ Greater safety for operators

ECONOMIC

- ⇒ Reduced maintenance time
- ⇒ Free Application
- ⇒ Sensor maintenance free

FLEXIBLE

- ⇒ Easy installation on bladder accumulator
- ⇒ Could equip existing or new units

RELIABLE

- ⇒ Battery life time >1 year
- ⇒ More efficient accumulator

Dimensions

Max Height: 175 mm

Ø: 45 mm + Valve 28 mm

Weight: 530 g

Safety Blocks

Parker Olaer has developed a complete range of Accumulator Safety Blocks for all standard and special applications. An accumulator safety block provides a safe solution for accumulator maintenance and operation.

- Safety blocks delivered assembled
- Minimum Temp: -15°C (except size 10: -10°C) | Maximum Temp: +70°C (except size 16: +80°C)
- Pressure relief valve sealed, delivered with EC declaration of manufacturing conformity
- Also available with electrical drain valve (24 V DC or 110 V AC or 220 V AC)

Safety Block with EC Safety Valve - certified by BV

Pressure Relief Valve Block

Parker Olaer has developed a complete range of pressure relief valve Blocks for all standard applications. This provides the minimal pressure protection required to protect an accumulator against pressure overboost.

- Pressure relief block delivered assembled; Pressure relief valve sealed delivered with EC certified by BV declaration of manufacturing conformity.

Adaptors

Parker Olaer has developed a complete range of adaptors for all standard fluid ports. The adaptors ensure that you have the right connection according to your network piping.

- Carbon steel plated; also available in stainless steel.

Part Number	Dimension	Design	Sealing system
04555200223	G1-1/4 --> G3/4	A	Seal in angle
04557000223	G2 --> G1	A	Seal in angle

04555800223	G 1-1/4 --> G1/2	B	Seal in fluid port
04555900223	G1-1/4 --> G3/4	B	Seal in fluid port
04557800223	G2 --> G3/4	B	Seal in fluid port
04557900223	G2 --> G1	B	Seal in fluid port

Design A - Seal in angle

Design B - Seal in fluid port

Gas Bottles

Parker Gas Bottles store nitrogen under pressure and provide additional gas volume typically for accumulator systems. The BAWN Gas Bottles without neck are interchangeable and can easily replace an existing unit.

- Cost effective solution for hydraulic systems.
- Conforms to PED 2014/68/EU, EN 14359 and ASME VIII div1 App22. Fluid Group 2.

Part Number	Description	Volume (L)	Pressure (bar)	Dimensions (mm)		Fluid port connection

How to size an accumulator

Accumulator Sizing Software

www.parker.com/acde

Parker Olaer has developed very sophisticated simulation software to optimise accumulator sizing recommendations.

Calculations are based on the real gas equation and real gases. The software allows for temperature and flow characteristics and has an intuitive Windows format that is easy to use!

The behaviour of accumulators used in applications such as pulsation dampening, surge arrestor, thermal expansion and energy storage can be simulated.

The latest version of the sizing software can be downloaded from our website.

Sizing Questionnaires

Customers can also complete a sizing questionnaire and send this to the local Parker Sales Office so that the most efficient accumulator can be sized for your application.

You can download the sizing questionnaires from our website or click on the links below if you are viewing a digital version of this document.

There are 4 questionnaires to select from:

1. [Energy Storage](#)
2. [Thermal Expansion in a closed circuit](#)
3. [Surge Arrestor / Waterhammer](#)
4. [Pulsation Damper](#)

How to size an accumulator → **ENERGY STORAGE**

Gerotor Pump - QPM3 Series

The Parker QPM3 Gerotor Pump is a low pressure pump for high efficiency.

- Maximum pressure: 10 bar
- Flow rate: from 10 l/min to 80l/min

Part Number	Description	Motor Power (kW)	Flow Rate (lpm)	Weight (kg)	Noise LpA dB(A) at 1m	Approx length C (mm) - may vary with motor supplier	Height K (mm)	Width H (mm)	Fixing point for feet F (mm)

NEW

Quiet Air Oil Cooler with AC motor - QAC Series

Offering the lowest noise levels compared to any other air oil cooler available on the European market.

The Quiet Air Oil Cooler (QAC) series is engineered for industrial applications, providing cooling capacity up to 160 kW and offers the lowest noise levels available on the market. This new air cooler range has an improved design which is optimized to significantly reduce noise levels making it more suitable for installation close to operatives and could help noise level regulations be met.

YOUR EXPECTATIONS

- Temperature regulation for hydraulic systems
- Conforming to legal requirements for noise
- Energy efficient motors
- Effective cooling capacity
- Low maintenance
- Reliability

OUR OFFER

- An efficient, quiet and cost saving cooling solution
- Low noise (65 to 82 dB(A)) depending on size
- Cooling capacity up to 4.25 kW/C°
- High efficiency IE3 AC motors
- Advancement of existing LAC cooler series and thus interchangeable

NOISE REDUCED

PRODUCTIVITY

RELIABILITY

SAFETY

LOW MAINTENANCE

COST SAVING

LIFESPAN

YOUR VALUE

- The hydraulic system's useful life is extended
- The oil's useful life is extended
- The hydraulic system's availability increases – more operating time and fewer shutdowns
- Service and repair costs are reduced
- High efficiency level maintained in continuous operation

Engineered and optimized low noise fan housing

Fan guard shaped to reduce noise level

Uncompromised cooling capacity

One piece fan guard – motor bracket with reduced air resistance

IE3 class electrical motors for better efficiency

Zero air recirculation design

Low noise optimized fan

Mounting feet for fixation

Sound Pressure Level dB(A) measured according to ISO 3743-1.

Noise levels should be used as reference only. Noise values are affected by room properties like size, walls and surrounding equipment.

Max static pressure: 21 bar
 Max Dynamic pressure: 14 bar**
 Standard Voltage: 230/400V (±5 %), 50 Hz | 265/460V (±5 %), 60 Hz
 Fluid Type: Mineral Oil (HL/HLP) or Water Glycol (HFC)
 Standard Colour: Jet Black (RAL 9005)
 ** Tested in accordance with ISO/DIS 10771-1

For more information about the QAC series please visit our website or download the QAC Series Brochure → [here](#)

Online Support

You can find the latest product information on the Parker website, parker.com/acde.

Designed to be accessible via desktops, tablets and smart phones you can download sizing software, e-configurators, manuals and 3D models.

Also our latest brochures and catalogues are available for viewing or downloading on our website.

How to size a cooler

NEW

More Cooling per €
with precise calculations and our engineers' support

Optimal sizing produces efficient cooling. Correct sizing requires knowledge and experience. Our calculation program, combined with our engineers' support, gives you access to this very knowledge and experience. The result is more cooling per € invested. The user-friendly calculation program can be accessed on:
<https://divapps.parker.com/divapps/CADE/SSW/>.

Valuable system review into the bargain

A more wide-ranging review of the hydraulic system is often a natural element of cooling calculations. Other potential system improvements can then be discussed – e.g. filtering, offline or online cooling, etc. Contact us for further guidance and information.

cooler sizing app

Sizing Questionnaires

Customers can complete a sizing questionnaire and send this to the local Parker Sales Office so that the most efficient cooler can be sized for your application.

You can download the sizing questionnaires from our website or click on the links below if you are viewing a digital version of this document.

There are 2 questionnaires to select from:-

1. Air Oil Cooler Sizing

2. Water Oil Cooler Sizing

Cylinders

Industrial Hydraulic Cylinders

INDUSTRIAL HYDRAULIC CYLINDER SERIES - HMI

Parker Series HMI Metric Hydraulic Cylinders, tie rod construction, are designed to meet the requirements of ISO 6020/2 (2006), 160 Bar Compact Series. HMI Series cylinders may be used for working pressures up to 210 Bar.

In addition to worldwide support, Series HMI incorporates a multitude of innovative design features that increase machine productivity through reduced downtime and provide improved system efficiency as a result of faster cycle times. Design features such as the “Jewel” rod gland assembly, hard chrome plated piston rods, and stepped cushions provide increased machine productivity. Lipseal™ piston is standard on 25mm, 32mm and 40mm bore sizes, and provides zero leakage under static conditions for hydraulic pressures up to 210 Bar. Parker’s B style piston, standard on 50mm and larger bore sizes, is a single seal design which incorporates two wear strips. This design provides smooth operation, long bearing life, and high load carrying capacity. The TS2000 Rod Seal in combination with the standard polyurethane Double-Service Wiperseal™ comprises a sealing system that delivers dry rod performance. Pressure actuated o-ring Body End Seals provide leak free service.

Every Series HMI cylinder is individually tested before leaving our plant to assure proper performance and leak free operation and comes with an 18 month warranty.

Please use the e-configurator on parker.com to customise your HMIF cylinder.
