

PERFORMANCE FORMULA[®]
NEW DIESEL FUEL ADDITIVE

STANADYNE[®]

NEW AND IMPROVED
PERFORMANCE FORMULA

Multifunctional Diesel Fuel Additive.

**Parker**

SAFEGUARD YOUR FUEL INJECTION SYSTEM.

- Cleans and protects fuel system components
- Increases power and economy
- Provides hot and cold weather protection
- Helps remove water from fuel

Parker's new and improved Stanadyne fuel additives protect and improve the performance of fuel injection systems, restoring engine performance.

- Removes varnish and other deposits
- Protects against corrosion
- Protects against ultra-low sulfur levels
- Suitable for use with bio diesel

STANADYNE®

Poor quality fuel can damage your fuel injection system. Through our experience in designing and manufacturing diesel fuel injection systems, along with extensive research and testing, we have found that there are many variations in diesel fuel quality across the globe.

Poor fuel quality can cause component wear, gum up valves and clog filters. Parker's new and improved Stanadyne Performance Formula® protects your diesel engine and restores engine performance. The new Performance Formula® is a premium, multipurpose, all season diesel fuel additive capable of tackling almost any diesel fuel related problem, ensuring reliable and smooth running engines.

New Generation Detergency
x4 Effectiveness

Extra Lubricity

Cetane Rating
Up to +4 points

Improved Cold Flow
Up to -30°C

Water Removal

Filterability

Low Emissions

Fuel Economy and Power

DPF Protection

Anti Corrosion

Fuel Stabilization

Sizes Available: 250ml, 500ml, 5L, 25L and 200L
Recommended Treatment: 250ml treat up to 125L litres of fuel
Multipage Labels: available in different languages
