

## PA30207

Conical-Shaped Outer Air Element

### NEW RELEASE

Construction, agriculture and mining applications experience some of the visibly dirtiest work environments. Even small contaminants that can be seen only with a microscope must be removed from the air stream before it enters the combustion chamber. For 99.9%+ removal of all of these types of dirt and other contaminants, use the Baldwin PA30207 filter. Contaminant holding capacity, along with high efficiency removal, ensure your equipment will stay working and not in the shop costing you valuable time.
