

LED Area Lights

Illuminating Instrumentation and More

Innovative, Compact Design

Parker's LED Area Lights represent the future of energy efficient illumination. The compact, lightweight LED lights are DC powered and produce the equivalent of up to 3.5 standard high-beam automobile headlights.

The Area Lights are UL Certified for Class I, Division 2 for Groups A, B, C and D.

Product Features:

- Compact, lightweight design for easy installation
- Operating voltage range 10.5 – 32 V_{DC}
- Provides up to 4200 lumens
- Pole mountable on existing structures
- UL Certified for Class I, Division 2 for Groups A, B, C and D hazardous areas

ENGINEERING YOUR SUCCESS.

LED Area Lights

A Winning Design

The Parker LED Area Lights are constructed of powder coated aluminum. With a rugged body construction, the LED Area Lights are designed for outdoor locations where dirt, corrosion, vibration and rough environments exist. The lights come ready for mounting with a bracket, 1/4" nylon-locking nut and a 1/4"x 2" long screw.

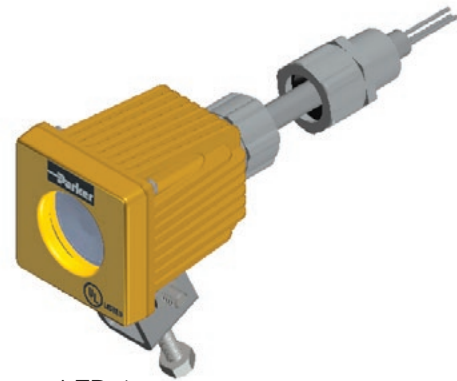

The assemblies are provided with a 3 foot, 16 AWG SOOW* power cord. The customer supplied DC power energizes the proprietary driving circuitry producing energy efficient, safe hazardous lighting. The units produce a 100° broad beamed high-intensity light. There are three lighting options available – a single, three, or six LED unit.

Certification

The LED Area Lights are UL listed for Class I, Division 2 for Groups A, B, C and D.

Part Number	# of LEDs	Lumens	Dimensions (W x H x D)	Weight	Power
LED-1	1	700	2.25" x 2.25" x 3.25"	1.5 lbs (0.68 kg)	12 W
LED-3	3	2100	6.25" x 2.75" x 4"	3 lbs (1.36 kg)	31 W
LED-6	6	4200	6.25" x 4.75" x 4"	4.5 lbs (2.04 kg)	47 W

*Service Oil Resistant Weather/H₂O Resistant
