

Vansco Multiplexing Module (VMM) Software Downloads

VMMS > Ladder Logic Development Software

VMM Ladder Logic software is available in 3 versions.

Creative provides full access to create and edit ladder logic applications.

Productive has advanced diagnostics, log access, I/O forcing, viewing, printing, and upload/download capabilities.

Active has basic diagnostics, viewing, and upload/download capabilities.

A 30-day **Demo** version is available for evaluation purposes.

A software product key is required to turn on the functionality and features of each version, including the trial version.

To order a VMMS Product Key:

Step 1: Complete and submit the [OEM-Authorized People](#) form.

- Required to obtain/establish OEM authorization
- Must be approved by authorized OEM representative
- Will be kept on record at Parker Vansco

Step 2: Complete and submit the [VMMS Product Key Request](#) form.

- Submit purchase order(s) for the software part number (access level) desired
- Notify us by e-mail if you need a copy of the invoice

Note: For a trial license key, only step 2 is necessary.
