# PR 10 | PR 12 | PR 14 | PR PB

The use of gas hoses (e.g. compressed air, nitrate, etc.) requires perforating the outer layer. With low effort, the PR 10 / PR 12 / PR14 makes perforating the outer layer of hoses easy.

The established UNIFLEX quality gives you a precision tool to work with hoses up to an outer diameter of 100 mm.

Constant and quick adjustments of the prick depth directly on the machine Closable needles Pricking from 4 sides simultaneously (PR 10/PR PB) No injury to the pressure holder Compact construction and tried-and-tested technique Perforating of even 8 mm OD hoses is possible Saves space User friendly Easy adjustment of hose dimensions 2, 3 or 4 wheels can perforate, depending on what is needed Saves money No course of instruction needed Patent solution vs. costs – PR PB No investments for additional machines No maintenance Saves time due to reproducible adjustments of the prick depths Easy handling	Perforating with standards					
Pricking from 4 sides simultaneously (PR 10/PR PB) No injury to the pressure holder Compact construction and tried-and-tested technique Perforating of even 8 mm OD hoses is possible Saves space User friendly Easy adjustment of hose dimensions 2, 3 or 4 wheels can perforate, depending on what is needed Saves money No course of instruction needed Patent solution vs. costs – PR PB No investments for additional machines No maintenance Saves time due to reproducible adjustments of the prick depths

# Additional Information

Constant prick depth

Side view

With perforating wheels

PR PB

Adjustments

• Perfect hose guidance and centration

• Optimal adjustment of hose dimensions

### **Compact construction**

• With minimum space requirements

Mobile usage possible

**Double Prick Wheels** 

Straight perforation

No twisting of hoses
