Test Benches & Cleaning Machines

Reliable, clean and eco-friendly.

Universal
For all types of hoses and fittings.

Ecoline
Value driven solution for less frequent use.

Integrated Tank
Saves work space and is quiet.

UNIFLEX

P 160

Hose lines that cannot withstand the high pressure for which they are designed can cause serious damage, resulting in high costs - often higher than the price of a test bench. Why take a risk that can be easily avoided?

By testing the quality of your products, you opt for safety. The P 160 or P 160 Ecoline workshop test benches allow for the efficient and safe final inspection and testing of hose lines. They are easy to operate and quickly become part of your routine procedures.

P 160

P 160 Ecoline

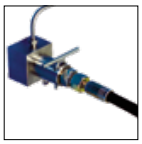

Quality and safety
Fully enclosed test chamber
Also suitable for static pressure testing of various hydraulic components such as valves, hydraulic cylinders, housings, quick-release couplings, etc.
Safety valve – when the hood is opened, all pressure is automatically released within 1/10 second
Hood with gas springs and transparent Makrolon® safety pane
Environmentally friendly test medium (water-oil emulsion)
Easy and safe to operate
Test bench can be retrofitted with extension element (P 160)
Logging software/printer available as optional equipment (Control B+ Touch) (P 160)
Compressed air filter with condenser
Innovative technology for fast processing
Parts to be tested (hose lines) can be inserted quickly by means of our Steck-O-System and without any time-consuming preparation or modifications to the tank
Fast filling and automatic pressure release of tested parts
CE compliant
Hood with gas springs and transparent Makrolon® safety pane

We reserve the right to make technical changes without notice. Options are machine parts that can only be ordered while buying the machine.

* Only one of the two options possible.

UPP Protokoll

Options

Control B + Touch (only for P 160)

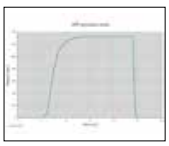

The P 160 is also available in stainless steel

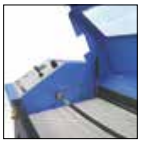

P 160 extension element
407.3150: Total chamber length 3 600 mm
407.3250: Total chamber length 4 400 mm

UPP Pressure Sensor for test benches.

Additional Information

Steck-O-System:

- Clean, quick and reliable connection
- Push-in system for easy assembly
- Ample space in chamber
- Adapter for fast connection

P 250

The P 250 Test Bench with Control C.2 IPC is a new modular test bench that can be adapted to your needs. It offers the possibility to test with Steck-o, Hand or Hydraulic quick cone system. You can also install a Euro Pallet inside. The Chamber also accepts a non-end extension if you prefer to test a hose lengthwise. The controller offers all parameters for a fully automatic test, with visualization of the pressure and may other features but also connectivity to your server or other machine in line with industry 4.0.

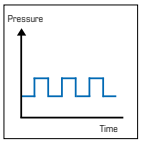

P 250

Quality and safety
Fully enclosed test chamber
Also suitable for static pressure testing of various hydraulic components such as valves, hydraulic cylinders, housings, quick-release couplings, etc.
Safety switch - when the hood is opened, all pressure is automatically released within 1/10 second
Environmentally friendly test medium (water-oil emulsion)
Easy and safe to operate
Quick changeover between automated and manual setup mode
Test bench can be retrofitted with extension element
Up to 120 tests per hour for a max. length of 2 500 mm (DN 12-800 mm)
Innovative documentation management
Time-saving product parameter memory
Proper documentation and controlling
Test reports printed on printer (optional)
CE compliant
Hood with gas springs and transparent Makrolon® safety pane

We reserve the right to make technical changes without notice. Options are machine parts that can only be ordered while buying the machine.

P 300 | 350

With the P 300, you can perform precision tests of hoses of up to 2 500 mm in length and with pressures up to 1 000 bar. Test up to 120 hoses per hour, making use of 4 parallel test lines and our quick-clamping system. You can choose between automated and manual setup mode. Our P 350 test bench unifies our years of experience with your advanced requirements for special hose equipment. The extra-large test chamber gives you the space you need for your challenge. Pallets with hoses as well as large, heavy hose coils can be easily supplied to the chamber by forklift. Hose samples are connected easily with adapter hose and quick connection to pressure ports.

P 300

P 300 Aggregate

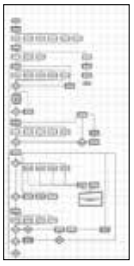

P 350

Innovation and quality
4 parallel test lines
Combination of two test chambers (mirror arrangement) (optional)
Fast workflow thanks to separately running test chambers (for alternate setup and testing)
Quick-clamping system holding up to 4 hoses for parallel testing with customized settings
Internal lighting system, adjustable machine feet and top-quality internal gear pump
Quick changeover between automated and manual setup mode
Separate portable power aggregate (with 2 m connecting hoses)
Max. hose length 2 500 mm
Safety and CE conformity
Automatic closing of test chamber (P 300)
Large inspection window made with transparent Makrolon®
Display for bubble-free flooding on aggregate
Customisable test logs and reports (for storage and printing)

We reserve the right to make technical changes without notice. Options are machine parts that can only be ordered while buying the machine.

Sealing cone set	✓	✓
Options		
Second chambers are possible	✓	✓

Standard P 300
Sealing cone set
USB interface/port
Pressure filter 12 µm
Return filter 12 µm
Compressed air maintenance unit

Standard P 350
Quick connector set (SSKV)
Automatic pressure control
Pressure filter 5 µm
Suction filter 100 µm
Anticorrosion additive EM 10 L
Fluid flow inspection glass
Integrated tank

2 clamping discs per head, catering to various diameters (OD 8-42 mm).

For hose assembly up to DN 19 (3/4"). Other sizes on demand.

Additional Information

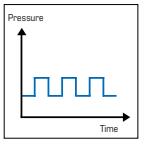

Sealing cone set (standard), DN 2.5 - 22 mm, 6 cones.

The height of the P 300 can be adjusted.

Axially adjustable quick-change system with adjustable rotating head.

Dynamic test.

- Rapid hose clamping system for the admission of up to four hoses with simultaneous checking (variable setting)
- Parallel test lines – four test lines per chamber
- Automatic starting of the given pressure values
- Two test chambers are possible – mirroring (one is loaded while a second chamber is testing)
- Test chamber standard size 3 600 mm
- Depending on different factors (flooding time, length + diameter of the hoses) you can test approx. 120 hoses per hour
- Adjustable height
- Fitting cones 3/4" (DN 2,5 – 22 mm) easy to change via simple unlinking (6 different cone sizes are available in standard package)
