Hand-tools

Par-Lok wrench

Par-Lok wrench

360° Snap-action ratchet wrench for inch sizes from $^{3}/_{8}''$ to $2^{1}/_{4}''$ accross flats. Inch sizes meet US government specifications and are listed as NSN-5120-00-474-7227.

Easy fitting assembly
Easy access ratchet wrench speeds fittings installation in tight locations. Rugged, snap-action jaws can be opened over tube lines, locked onto fitting hex and ratcheted within $^{1}/_{8}$ turn. Full six point contact prevents fitting distortion common with wrench slippage. Ideal for tube line installations where compact runs required multiple fittings make-up, disassembly and remakes.

Specifications
Par-Lok wrenches are available individually. Par-Lok jaws are constructed from drop-forged, high carbon steel material with a black conversion coat finish. Par-Lok handles are made from heavy gauge steel material, heat treated and with a corrosion resistant black finish. Solid stainless steel rivets and tempered jaw springs are designed into every wrench for maximum strength.

Features, advantages and benefits of Par-Lok wrench:

1. **360°** – No slipping and hexagon damage.
2. **Snap-mechanism** – Ideal for tube fitting assembly.
3. **Light** – Par-Lok wrenches belong in the standard toolbox of each fitting engineer.

Inch Sizes			
Hex Size	Order code	Hex Size	Order code
3/8	860062-6	1 1/8	860062-18
7/16	860062-7	1 1/4	860062-20
1/2	860062-8	1 3/8	860062-22
