Charging Sets

The Parker Charging kit is an indispensable instrument for checking, adjusting or filling nitrogen into most of the hydraulic accumulators available on the market.

- For membrane accumulators no adaptor is required.
- All country adaptors and more technical data available
- A wider range of products and more technical information is available on the Parker website and in the Accumulator Catalogue.

Part Number	Description	Country	Pressure
20214122823	VGU/F.25/250.8.TS2.3	France	0-250
20214122833	VGU/F.25/250.8.TS3.3	Germany	0-250
20214122893	VGU/F.25/250.8.TS9.3	Netherlands	0-250

Charging Set Includes:

- VGU universal tester and pressuriser
- Set of accumulator adaptors (5/8”, 7/8”, 7/8” long, G1/4”, 8V1)
- 1 pressure gauge 0-25 Bar
- 1 pressure gauge 0-250 Bar (other pressure gauges available on request)
- Special nitrogen hose (length 2,5 m)
- Nitrogen connection according to country standard.
