Parker Hannifin

The global leader in motion and control technologies

A world class player on a local stage

Global Product Design

Parker Hannifin has more than 40 years experience in the design and manufacturing of drives, controls, motors and mechanical products. With dedicated global product development teams, Parker draws on industry-leading technological leadership and experience from engineering teams in Europe, North America and Asia.

Local Application Expertise

Parker has local engineering resources committed to adapting and applying our current products and technologies to best fit our customers' needs.

Manufacturing to Meet Our Customers' Needs

Parker is committed to meeting the increasing service demands that our customers require to succeed in the global industrial market. Parker's manufacturing teams seek continuous improvement through the implementation of lean manufacturing methods throughout the process. We measure ourselves on meeting our customers' expectations of quality and delivery, not just our own. In order to meet these expectations, Parker operates and continues to invest in our manufacturing facilities in Europe, North America and Asia.

Electromechanical Worldwide Manufacturing Locations

Europe
Littlehampton, United Kingdom
Dijon, France
Offenburg, Germany
Filderstadt, Germany
Milan, Italy

Asia
Wuxi, China

Triple Axis Servo Drive - TPD-M

Overview

Description

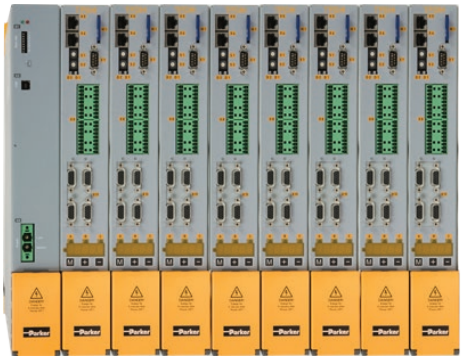

TPD-M is a multi axis system where each power module can supply up to three servo motors. The base configuration consists of a common DC bus supply (PSU) and multiples TPD-M modules, connected through DC bus bars.
The modules are available as one, two or three axis versions. This makes the system very flexible.
The TPD-M drive has been specifically designed for the Packaging OEM market but it can also be used in many other centralized automation structures which incorporate a large number of servo axes offering significant advantages.
TPD-M controls also induction motors with feedback or sensorless in V/f mode.

- **Packaging machines**
- **Material forming machines**
- **Textile machines**
- **Paper and converting lines**
- **Plastics machines**
- **Machines tools**

Motion control functionality is performed by means of EtherCAT Real Time CoE (CAN over Ethernet) communication, CAN / CANopen DS402 communication.

Features

- **The most compact multi-axis servo drive on the market**
- **Quick and simple wiring**
- **One, two or three axis versions combined in one housing**
- **Removable SD card**
- **Common DC bus connection for energy exchange between drives**
- **Feedback: Resolver, Hiperface and EnDat interface, Hall sensors, rotary and linear encoders**
- **New feedback: Hiperface DSL feedback ® Reduced cabling; only one cable connection between drive & motor**
- **Fieldbus: CANopen - standard, EtherCAT - option**
- **Serial link and CAN auto-address**

Technical characteristics - Overview

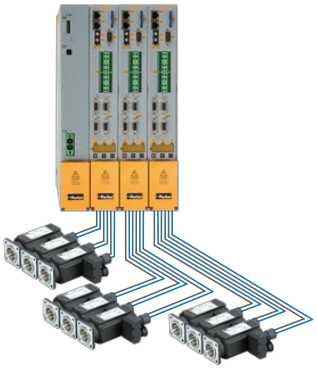

TPD Axis	Continuos current [A_{rms}]	Peak current A (≤ 2 s)
3 axis	2 + 2 + 2	4 + 4 + 4
	8 + 5 + 5	16 + 10 + 10
2 axis	2 + 2	4 + 4
	5 + 5	10 + 10
	8 + 8	16 + 16
	15 + 5	30 + 10
1 axis	5/10/15/30	10/20/30/60

TPD-M Overview

TPD-M has been developed for all applications where multiple drives are normally used and gives both OEMs and end users the opportunity to reduce build, configuration and operating costs, while boosting productivity and profitability.

Typical applications for TPD-M include packaging machines, material forming machines, textile, paper, converting and plastics machines, where large numbers of axes are required.

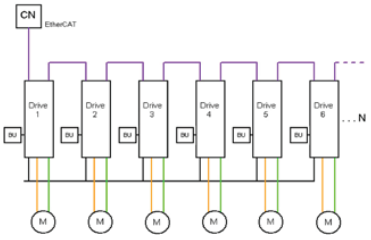

TPD-M system with Parker servo motors

Features and Benefits

Control cabinet space, size and cost savings

The integration of three servo power stages in a single housing offers machine builders the opportunity of having more compact control cabinets. Each TPD-M module is only 50 mm width (100 mm in the single axis 30 A version).

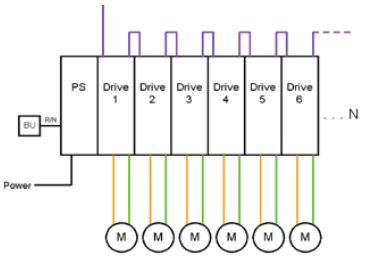

Traditional solution: one drive for each axis

Reduced system complexity

The complexity of the system is significantly reduced due to the following benefits:

- **Fewer components (cables, connectors, filters and braking resistors)**
- **Fewer communication interconnections between devices**
- **Centralized filtration and braking resistance**

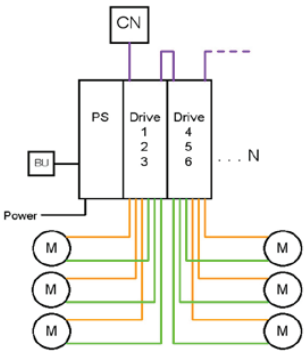

Rack solution: one drive for each axes in a rack solution

Reduce setup and maintenance costs

Due to the modular nature of TPD-M, machine design is much more straight forward. Additional axes can be added easily, simply by reproducing schemes from other existing axes. Programming time is reduced as only one drive unit needs to be configured.

Efficient power control

TPD-M works on a common DC bus power supply that allows the system to absorb and re-supply much of the braking energy to other TPD-M units rather than dissipating it in the form of heat via external resistors. In some instances, resistors can be removed completely and in others smaller resistors are required.

TPD-M solution: one drive for three axis in a rack solution.Only one Power Supply

Standard Version

TPD-M servo drives is available as one, two or three axis versions. As standard TPD-M is supplied with:

- **CANopen**
- **STO functionality (certification expired)**
- **Digital and analog inputs/outputs**
- **Mechanical brake control**

Tel: +45 63 12 83 00 | Email: ps@hymatik.com | www.hymatik.com | Hvidkaervej 27a, DK-5250 Odense SV, Denmark

TPD-M Overview

Application

TPD-M servo drive is particularly suitable for all centralised automation systems, such as those found in many packaging machines, where large numbers of drives are often required.

- **Packaging lines**
- **Material forming machines**
- **Textile machines**
- **Paper and converting lines**
- **Plastics machines**
- **Machine tools**

Functionality

Additional features of TPD-M include an USB interface for configuration and setup plus a standard SD card interface for storing system parameters.
TPD-M can be integrated into a larger hybrid motion solution (centralized and decentralized) using Parker Motornet DC system.

Options

The capabilities of TPD-M can be further enhanced with numerous options which are available upon request, including:

- **EtherCAT communication**
- **Hiperface DSL® feedback**
- **Braking resistors**
- **Additional inputs/outputs**

Safety technology (certification expired)

TPD-M supports the "Safe Torque Off" (STO) safety function in the sense of the "Safe Stop", with protection against unexpected startup. Switching off the motor torque must be effected by the machine controller.
According to a risk analysis which must be carried out according to the machine standard 89/392/EWG or EN 292; EN ISO 13849-1 and EN 1050, the machine manufacturer must project the safety system for the entire machine including all integrated components. This does also include the electrical drives.

TPD-M Features

Communication	
	• via USB port
Networks and Bus Systems	

	• CANopen, 20...1000kbit/s, SDO1, PDO1...PDO4
	• EtherCAT, 100Mbit/s, 1 ms cycle time
	• Via Gateway
	  • Profibus
	  • DeviceNet

Inputs / Outputs	

	• 4 digital input,
	• 2 digital output,
	• 1 analog input
	• 1 analog output for each axes.
	• 1 incremental encoder input,
	• 1 incremental encoder output
	• Additional I/O
	  • 3 analogue inputs 12bit,
	  • 2 incremental encoder input,
	  • 2 incremental encoder output
	• Auxiliary Encoder

Supported Feedback	
	• Resolver, • SinCos, • SinCos + EnDat, • SinCos + Hiperface, • SinCos (1 per pole pitch), • Quadrature, • Quadrature + Hall, • SinCos + Hall, • Hiperface DSL®
Programming / Configuration	

	• PicoPLC
	• MotionWiz with Oscilloscope function, real time and debugging features
	• Removable SD card for
	  • software upgrade,
	  • parameters and
	  • application memory

Technology Functions	
	• Torque control • Speed control • Position control • Electronic gearbox • Camming
Safety Functions (certification expired)	
	• 1 Safety Torque Off circuit for 3 axis module • 2 independent Safety Torque Off circuit for 2 axis module • 1 Safety Torque Off circuit for 1 axis module

Accessories and Options

Hiperface DSL® Feedback

Description

The Single Cable Servo Drive System from Parker is a combination of the low inertia servo motor SME and the triple axis servo drive TPD-M based on the Hiperface DSL® digital feedback technology.
The encoder feedback communication is fully integrated into the motor power cable and thus no separate feedback cable between drive and motor is required.
The new feedback system is a purely digital encoder communication protocol with exceptional performance. The absolute position determination, a resolution of up to 20 bit per turn, as well as 4096 maximum rotations, is unique in it's class.
The System is completed by the multi-axis servo drive TPD-M which represents one of the most compact solutions on the market giving the possibility of controlling up to three single cable SME servo motors with one 50 mm drive module.
Therefore, the Single Cable Servo Drive System from Parker is a bespoke solution to provide machine builders with lower cabling and installation cost and the possibility to reduce control panel size and machine footprint.

TPD-M triple axis servo drive connected to SME motors via Hiperface DSL® interface: One cable per servo motor instead of two.

Feedback-Features

- **One cable connection between drive and motor instead of two**
- **No need for separate feedback cable and connector**
- **Fully digital and interference-free communication**
- **Synchronous, bidirectional, multi-channel**
- **Easy setup and reduced wiring**

Applications

- **Packaging Machinery**
- **Material Handling**
- **Machine Tools**
- **Robotics**
- **Paper & Converting**

Configuration Software - MotionWiz

MotionWiz is free of charge downloadable configuration software that allows users to configure and optimise the TPD-M series with a few easy clicks of the mouse.

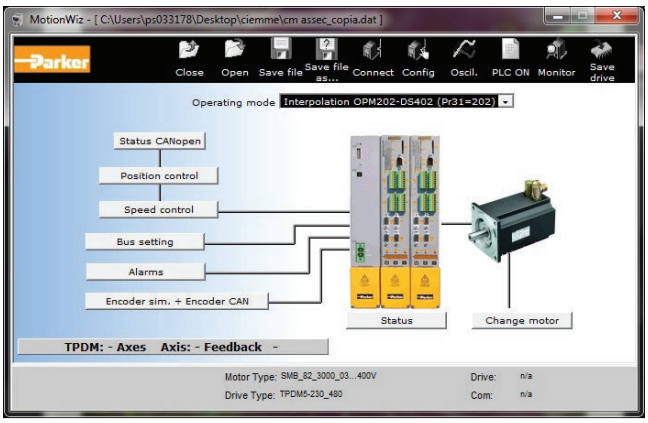

MotionWiz features an intuitive, easy and simple to use Windows® style environment to aid installation, optimisation and diagnostic use.

MotionWiz permits operation in both “on line” mode, directly in the controller, and in “offline” mode, remotely on the PC before downloading to the controller.

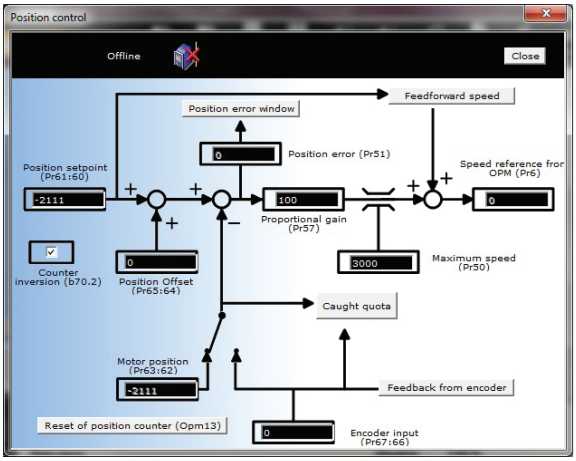

To simplify the configuration of systems with a large number of similar axes but with different motion profiles, MotionWiz allows users to copy the configuration from one application to another.

Inside the MotionWiz configurator is a database containing the technical characteristics of the full range of Parker motors and drives.

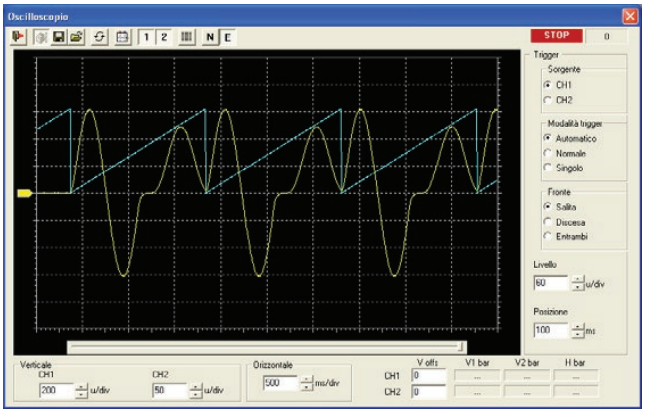

MotionWiz can be downloaded at www.parker.com/eme/tpdm

MotionWiz: General settings

MotionWiz: Position control

MotionWiz Oscilloscope: Real speed & torque trends

Parker Solutions for Servomotors and Accessories

NX: Brushless servo motors

The NX series brushless servo motors are characterized by a 10-pole innovative design for highest quality of motion, improved torque density and a compact and robust design. A large set of torque / speed characteristics, options and customization possibilities are available, making NX Series servomotors the ideal solution for most servosystems applications.The NX Series is available in sizes from 0,45 to 64 Nm.

SMB/H-MB/H: Brushless servo motors

The MB/H and SMB/H Series of highly-dynamic brushless servo motors utilise "salient pole" technology to produce an extremely compact design. Motor dimensions are drastically reduced and significant gains in terms of torque and dynamic performance are achieved. The high quality Neodymium-Iron-Boron magnets and the encapsulation method used to fasten them to the shaft, allows the two Series' to achieve very high acceleration and withstand high overloads without risk of demagnetisation or detachment of the magnets. The MB/H and SMB/H Series is avalaible in sizes from 0.2 to 285 Nm.

Interact Xpress: HMI

Interact Xpress is Parker's HMI hardware and software solution, for the process's control in distributed applications where multiple HMIs are deployed on a single machine or across several remote stations. Interact Xpress software, features an advanced development environment for easy creation of rich graphics and multimedia applications. Interact Xpress allows you to run, view and edit on line - from any PC -applications in Internet Explorer™ browser. Available with 6, 8,10 and 15 inch, these units are specifically designed to optimize the performance, storage and connectivity features of the software.

PIO: I/O System

Parker's PIO modular bus terminal system offers a range of popular industrial fieldbus networks to interface to a wide variety of control signals from field-based devices. Connection to field level devices can be implemented quickly and reliably with PIO.

PS/RS Series: Planetary Gearheads

Stealth advanced gearheads are available in either in-line or right-angled versions with 8 frame sizes and 12 gear ratios. With input speeds up to 6000 min^{-1} and exceptionally quiet, strong and reliable operation, you can be confident that there is a Stealth advanced gearhead to fit any of your high performance servo application needs.

Key Products

Dynamic seals
Elastomeric o-rings
Electro-medical instrument design & assembly
EMI shielding
Extruded & precision-cut, fabricated elastomeric seals
High temperature metal seals
Homogeneous & inserted elastomeric shapes
Medical device fabrication & assembly
Metal & plastic retained composite seals
Shielded optical windows
Silicone tubing & extrusions
Thermal management
Vibration dampening
