

# AC15 Variable Speed Drive

Compact AC Drive for Motor Control in  
General Purpose Applications  
0.5 - 40 HP (0.37 - 30 kW)  
Catalog HA540115

ENGINEERING YOUR SUCCESS.

**⚠ Warning!**

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

**OFFER OF SALE**

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance by the provisions stated in the detailed 'Offer of Sale' which is available upon request.

## Parker Hannifin

The global leader in motion and control technologies and systems

### Global Partnerships Global Support

Parker is committed to helping make our customers more productive and more profitable through our global offering of motion and control products and systems. In an increasingly competitive global economy, we seek to develop customer relationships as technology partnerships. Working closely with our customers, we can ensure the best selection of technologies to suit the needs of our customers' applications.

### Electromechanical Technologies for High Dynamic Performance and Precision Motion

Parker electromechanical technologies form an important part of Parker's global motion and control offering. Electromechanical systems combine high performance speed and position control with the flexibility to adapt the systems to the rapidly changing needs of the industries we serve.

## Electronic Motion and Controls Division Manufacturing

Parker drive products are manufactured globally to provide our customers with quality products at a competitive price point. In addition to factory-direct support, Parker provides sales assistance and local technical support through a group of dedicated sales teams and a network of authorized systems integrators, field service engineers, and technical distributors across the globe. For contact information, please refer to the Sales Offices listed on the back cover of this document or visit [www.parker.com/emc](http://www.parker.com/emc)

Rohnert Park, CA

# Variable Speed Drive - AC15 Series

## Overview

### Description

The AC15 Compact Drive is a simple to use, reliable and economical solution for every-day motor control applications that require speed or torque control in the power range of 0.37 kW to 30 kW (0.5 to 40 HP). With compact dimensions and features normally only associated with higher specification drives, including Safe Torque Off, Ethernet communications, sensorless vector mode for control of both Permanent Magnet (PMAC) and AC induction motors and a full 150 % overload for 1 minute, AC15 provides an optimized solution for OEM machine builders looking for a compact, cost-effective drive without compromising on performance.

### Simplicity

AC15 is designed to reduce the time and effort required to install, setup and commission through it's easy to use integrated keypad and application macros, or the powerful DSE Lite software tool and rich function block set. Minimal wiring requirements and easily accessed terminals make AC15 quick and easy to install. Auto-tuning sensorless vector mode takes AC15 beyond simple V/Hz control allowing users requiring greater dynamic speed or torque control for their application to benefit from the drive's enhanced speed and torque accuracy.

### Reliability

Proven technology and manufacturing techniques ensure AC15 has been engineered and built to deliver consistently outstanding levels of performance day in, day out, ensuring maximum uptime and productivity.

Thanks to its conformally coated PC boards, AC15 is capable of withstanding class C3 environments, allowing you to operate AC15 with the utmost confidence in more applications.

### Technical Characteristics - Overview

<b>Power Supply</b>	220 - 240 VAC ±10 % Single Phase 220 - 240 VAC ±10 % Three Phase 380 - 480 VAC ±10 % Three Phase
<b>Input Frequency</b>	50/60 Hz ±10 %
<b>Power Range</b>	0.37 - 30 kW (0.5 - 40 HP) HD
<b>Overload</b>	150% for 60 sec.
<b>Output Frequency</b>	0.5 - 590 Hz
<b>Safe Torque Off (STO)</b>	SIL2, PLd
<b>Operating Temperature</b>	0 - 40 °C (derate up to max 45°C) <sup>1</sup>
<b>Altitude</b>	0 - 1000m (derate up to 2000m)

<sup>1</sup>Temperature derate not available on .37kW 230V model.

#### Extra power when it's needed!

- 150% overload for 60 seconds to provide extra starting torque for high inertia loads

Variable Speed Drive - AC15  
Features

## Features

### AC15 Series Drive

### Standards & Compliance

The product is certified to the latest international standards:

Europe:

- Low Voltage Directive 2006/95/EC
- Electro-Magnetic Compatibility Directive 2004/108/EC
- EN61800-5-1:2007
- EN61800-3:2014+A1:2012
- IE 2 Compliant

North America & Canada:

- UL 61800-5-1
- CSA22.2 #14

\*Ethernet/IP provided on frame 2 and larger only

## Applications

AC15 provides a straight-forward approach to general purpose industrial motor control applications across a wide range of industries, giving users the benefits of the inherent energy-saving properties of using a variable speed drive, as well as the improved reliability and extended service life benefits associated with smoother starting and stopping of regularly cycling loads.

### Typical applications for AC15 include...

- Conveyor
- Centrifuge
- Fans
- Mixers
- Packaging Machines
- Textile Machines
- Strapping Machines
- Labelling Machines
- Industrial Washing Machines
- Machine Tool Spindles
- Roller Doors

**Conveyors**

**Centrifuges**

**Fans**

**Mixers**

**Packaging Machines**

**Textile Machines**

30	15G-45-0440-BF	35	38	
40	15G-45-0600-BF	46	52	

\*Ethernet/IP provided on frame 2 and larger only

### Electrical Characteristics

<b>Power Supply</b>	220 - 240 VAC ±10 % Single Phase 220 - 240 VAC ±10 % Three Phase 380 - 480 VAC ±10 % Three Phase
<b>Input Frequency</b>	50/60 Hz ±5 %
<b>Power Range</b>	0.5 - 40 HP HD / 0.37 - 30 kW
<b>Overload</b>	150% for 60 sec
<b>Output Frequency</b>	0.5 - 590 Hz
<b>Max. Switching Frequency</b>	10 kHz
<b>Control Modes</b>	Volts/Hertz or Sensorless Vector (SV) Mode
<b>Supported Motors</b>	Induction & PMAC

### Environmental Characteristics

<b>Temperature range</b>	0-40 °C (derate up to max. 45 °C) <sup>1</sup>
<b>Humidity</b>	Up to 90 % Relative Humidity, non-condensing
<b>Vibration</b>	< 0.5 g
<b>Altitude</b>	0-1000 m (derate 1% per 100m up to max. 2000m)
<b>Protection Degree</b>	IP20
<b>Pollution Degree</b>	Category 2
<b>Chemically Active Substances</b>	Compliance with EN60271-3-3: C3

<sup>1</sup>Temperature derate not available .37kW 230V model.

### Standards and Compliance

<b>Europe</b>	This product conforms with: - Low Voltage Directive 2006/95/EC - Electro-Magnetic Compatibility Directive 2004/108/EC - EN61800-5-1:2007 - EN61800-3:2014+A1:2012
<b>North America / Canada</b>	Certified to the following standards: - UL61800-5 - CSA22.2 #14 as an open-type drive
<b>STO</b>	Independently certified to: - EN ISO 13849-1:2015 - EN 61800-5-2:2017 - EN 61508
<b>RoHS</b>	This product complies with the RoHS substance restrictions in accordance with EC Directive 2011/65/EU
<b>REACH</b>	This product complies with the REACH regulations EC1907/2006

X3.6	0V	0V reference for analogue & digital I/O
X4.1	0V	0V reference for analogue & digital I/O
X4.2	24V	24V user supply
X5.1	DIO1	Digital Input / Output 1 (24V configurable)
X5.2	DIO2	Digital Input / Output 2 (24V configurable)
X5.3	DIN3	Digital Input 3
X5.4	DIN4	Digital Input 4 (High speed capable)
X5.5	DIN5	Digital Input 5 (High speed capable)
X5.6	DIN6	Digital Input 6
X5.7	DIN7*	Digital Input 7
X5.8	DIN8*	Digital Input 8
X6.1	STO1	STO input channel A
X6.2	STO0V	STO 0V reference
X6.3	STO2	STO input channel B

\* = Frames 2-5 only

## Software

### Parker Drive System Explorer (DSE Lite)

Parker drive configuration software Drive System Explorer (DSE) Lite is an easy to use drive configuration software package, designed to make programming your application as simple as possible without compromising on functionality.

DSE Lite is based around straightforward block programming and an intuitive user interface which supports user-defined configurations and offers real-time monitoring and charting. DSE Lite allows the user to create, parameterize and configure user defined applications as well as parameterize and connect fixed Motor Control blocks with up to 100 'links'

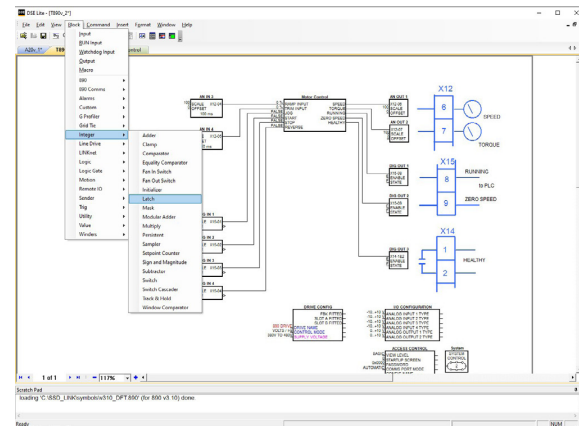

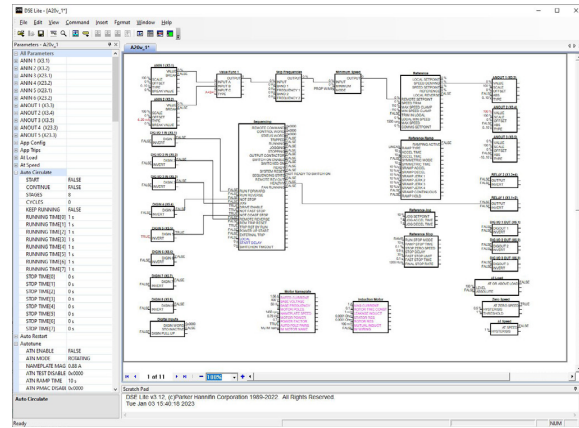

Thanks to the on-line help and pre-configured macro templates, users can achieve the optimum drive configuration without the need to navigate through complicated parameter menus.

**DSE Lite for AC15 uses a standard Ethernet connection between PC and inverter, so no special cable is required.**

**DSE Lite is available free of charge to download here: [discover.parker.com/DSELite\\_software](http://discover.parker.com/DSELite_software)**

Enhanced features of the AC15 include:

- High speed Ethernet connectivity
- Network scan feature
- Drive network identification
- Firmware installs over Ethernet
- Save a project to on-board Flash memory

## Accessories and Options

### 6901 Remote Mounting Keypad

The popular 6901 remote mounting keypad can be mounted away from the drive, such as on the door of an electrical enclosure. This interface allows users to configure, operate and monitor the drive without having to access the drive directly.

The remote keypad provides an alternative to the drive mounted keypad, offering a clear English language display and greater functionality. The remote mounting kit provides a mounting bezel and a 1.5 m cable that is plugged into the RJ11 port on the drive.

Order Code	Description
6901-00-G	6901 DisplayKeypad
6052-00-G	6901 remote mounting kit

### Cable Screening Bracket

Cable Screening Brackets are available for the AC15. These brackets offer a means of grounding the power cable screen connections, as well as supporting the power cables when connected to the drive.

## Accessories and Options

### Line Protection

Line fuses and reactors offer drive protection from short circuits and supply transients. When used with the fuses mentioned here, a short circuit rating of 50,000 amps can be achieved.

Line fuses are mandatory on all sizes

Line reactors are mandatory on all sizes

## Accessories and Options

### Braking Resistor

During deceleration, or with an over-hauling load, the motor acts as a generator. Energy flows back from the motor into the DC link capacitors within the drive, causing their voltage to rise. If this voltage exceeds a maximum value, the drive will trip to protect the capacitors and internal power devices. The amount of energy that can be absorbed by the capacitors can vary between different applications causing the drive to trip on overvolts. To utilize the drive's onboard dynamic braking capability, high power resistor(s), connected across the DC link, allow the dissipation of this excess energy for fast stops or load braking.

40		15G-45-0600-BF	LA471362	25	25	756

All braking kits include a thermal overload with auxiliary contact.

All braking kits are rated for occasional stopping duty, not more than 6 stops per hour.

For continuous power absorption or intermittent duty braking, consult factory.

### EMC Filter

AC15 are supplied as standard with an EMC filter that meets the requirements of a class C3 environment. For class C2 or C1 environments, an additional external filter may be required. An internal wire link may be easily removed to disconnect the Y capacitors for those installations where earth currents are undesirable.
